

## Population Growth

# Papatoetoe ward

## 2006 Census Profile

Te Kaunihera o  
MANUKAU  
City Council

The name Papatoetoe means 'undulating area where the toetoe (toi toi) is the predominant feature'. It was a popular area for Maori because of its fertile soils, and because it is near the narrowest point for hauling canoes between the Manukau and Waitamata Harbours.

The first European settlers (predominantly of Scottish and Irish origin) arrived in 1851 to farm the area. After World War Two, Papatoetoe experienced another burst of development initiated by the Rehabilitation Scheme that provided returned servicemen the means to build houses. By the 1980s the area was almost fully developed and population growth had virtually ceased. However, an increase in infill housing in more recent years has seen a slight rise in the population. In 1990 Papatoetoe became the Ward as we know it today where people enjoy living in an established area, with close proximity to the airport, motorway and shopping malls. The free community facilities, good schools and cultural diversity are valued and older people enjoy the ease of getting around.

### Statistical Highlights

Between the 2001 and 2006 censuses, Papatoetoe's population grew by almost 12% to a total of 40,659 residents of which 34% of residents belong to the European ethnic group, followed by 33% Asian, 26% Pacific Peoples and 16% Maori.

Papatoetoe has Manukau City's highest population of Asian people and the highest number of residents aged between 20 to 40 years. Elderly residents make up 10% of Papatoetoe's population and is the second highest in Manukau City. The community's median age of 31 years equals that of the city. City-wide comparisons show Papatoetoe to have the highest number of Islam/Muslim and the most number of adults in the clerical profession and the highest number of workers in the Health Care and Social Assistance industry. Although 6% of residents hold an advanced vocational qualification, 30% do not hold any formal qualification.

**General footnotes:** (1) This data has been randomly rounded to protect confidentiality. Individual figures may not add up to totals, and values for the same data may vary in different tables. (2) "Total Responses" includes all of the people/households who stated or reported more than one response and has been counted in each applicable group. Therefore the total number of responses in the table will be greater than the total number of people/households.
